This document has been designed to allow children who are hospitalized and have suffered of a brutal loss of speech, to compensate this loss of communication.

This booklet is for children between 2 and 10 years old, for their family, surrounding people, and their caregivers. It helps not to lose contact and limits frustration and anxiety of not being able to communicate basic needs. It is available in two versions: in colour and in black and white. The version in black and white comprises a playful tool to personalize pictures through colouring. It is to be given to children, parents and caregivers concerned.
